

ConvergeOne End-to-End Security Solutions and Services

Defend your Organization Before, During and After an Attack

Attackers today are more pervasive, persistent, and proficient than ever at evading and disrupting traditional security infrastructure. Are you taking the appropriate precautions?

ConvergeOne understands the unique needs of your industry and the ever-changing environment in regulated and unregulated organizations. We impact your business with increasing performance and scale requirements, mobile device proliferation, and the increasing need for employees to communicate and collaborate securely in real time.

Our methodology and end-to-end architecture protects, detects and contains threats across the attack continuum.

FireStorm POV (Proof of Value) – ConvergeOne’s Security Assessment

How will you know if you’ve been hacked?

ConvergeOne’s FireStorm Security POV is a sanity check, that utilizes Cisco® FirePOWER Services. It will enhance your visibility of real-time attacks, malware exposure, and network risk with industry leading advanced protection. Our FireStorm POV provides a hands-on opportunity to utilize Cisco’s next-gen FirePOWER technology in your very own environment with live data. It is the industry’s first adaptive, threat-focused next-generation firewall (NGFW).

We will monitor threat defense across the entire attack continuum for 7days. You will receive greater visibility into your environment and have the information presented to you in 3 concise reports:

- **Network Risk Report**
- **Attack Risk Report**
- **Malware Risk Report**

Only half of organizations discover malware events within 35 days. Don’t become a statistic.

CONSULTING

- Risk Management
- Penetration & Vulnerability
- Shadow IT
- Secure Cloud
- Social Engineering

ARCHITECTURES AND SOLUTIONS

- BYOD
- Anti-Malware
- Secure Cloud & Data Center
- Data Loss Prevention
- Single Sign-On
