

# End-to-End Security Simplified with C1 and Cisco

Comprehensive, Cost-Effective Security for <u>Enterprise IT Teams</u>

## Key areas to secure in enterprise cybersecurity

#### Network perimeter

Protect entry points against unauthorized access, malware, and DDoS attacks.

#### **User access & identity**

Ensure secure, role-based access to critical systems and data with strong identity management.

#### **Endpoints** Secure all devices connected to your network, from laptops and mobile phones to IoT devices.

## **Cloud** environment

Protect data, applications, and workloads in multi-cloud and hybrid environments.

# Data protection & compliance

Safeguard sensitive data and maintain compliance with regulatory standards.

## Email & communication channels

Prevent phishing, malware, and other threats from compromising business communications.

## Internal network traffic

Monitor network traffic to detect suspicious activities and prevent lateral movement.

# A holistic, end-to-end approach with C1 and Cisco

## **Cisco security solutions**

- **Cisco® Secure Network Analytics:** For network perimeter and internal traffic monitoring
- **Cisco® Duo:** For secure user access and identity management
- **Cisco® Secure Endpoint (AMP):** For endpoint protection across devices
- **Cisco® Cloud Protection Suite:** For multi-cloud and hybrid security
- **Cisco® Secure Email:** For safeguarding communication channels
- **Cisco® Talos Intelligence:** For advanced threat detection and intelligence across all areas

## C1 managed services enhancements

# 24/7 monitoring & incident response

Constant monitoring to detect threats and respond swiftly, ensuring uninterrupted protection.

## Seamless integration & deployment

Efficiently integrate Cisco solutions with minimal disruption, saving time and resources.

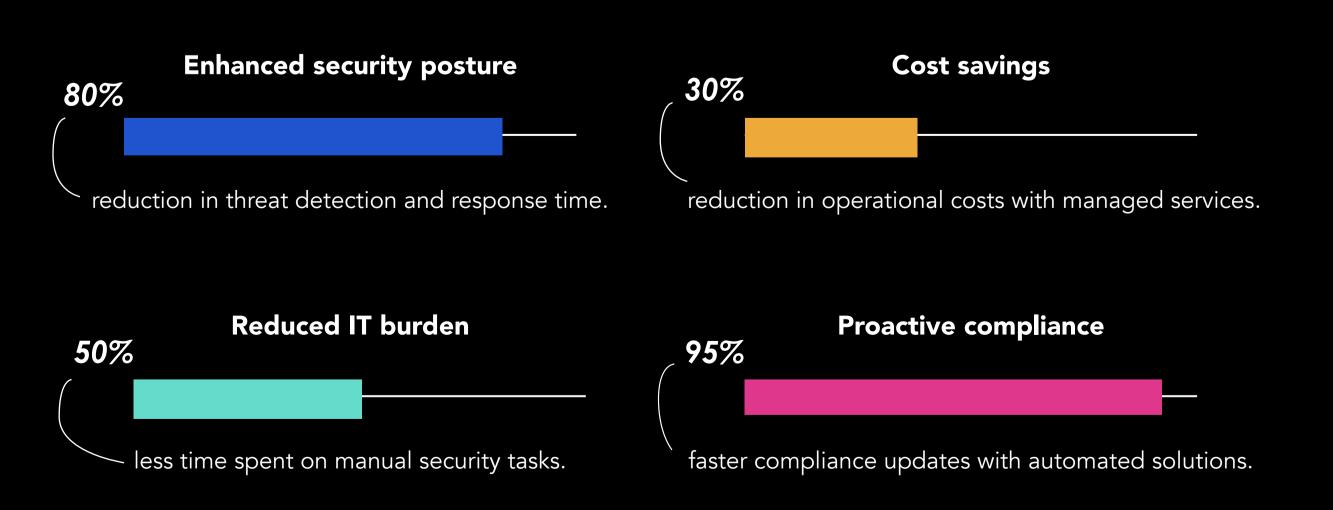

# Threat intelligence & compliance management

Proactively leverage Cisco Talos for up-to-date threat intelligence and manage compliance tasks, easing IT workload.

## **Cost optimization**

Outsourced security management reduces the need for in-house resources and lowers overall costs.

# The benefits of a synergistic partnership

# Ready to secure your enterprise with a holistic approach?

Contact C1 today to discover how our Cisco-powered security solutions can protect every corner of your organization, with end-to-end managed support that optimizes your resources and reduces costs.
