C1 + Cisco Security Solutions
Unified, Scalable, and Proactive Security for the Modern Enterprise

PARTNER OVERVIEW

C1 is a leading provider of cybersecurity solutions, offering expert-driven services that empower organizations to proactively defend against evolving cyber threats. Through a strategic partnership with Cisco, C1 integrates Cisco's industry-leading security technologies with its managed services to deliver an end-to-end security solution. This powerful combination reduces operational complexity, strengthens cybersecurity resilience, and lowers security costs.

Together, C1 and Cisco deliver a unified security framework that protects every layer of IT infrastructure—from the network to cloud environments and endpoints—ensuring seamless protection across the enterprise.

C1 + Cisco Security Solutions

Network & Infrastructure Protection

Cisco Secure Firewall: Advanced perimeter defense with intrusion prevention.
Cisco Secure IPS: Detects and blocks sophisticated network threats.

Cisco SD-WAN: Secure and optimized network connectivity.
**C1 Managed Services:** 24/7 monitoring, configuration management, and real-time threat response.

Cloud Security

Cisco Umbrella: DNS-layer security and secure cloud access.
Cisco Secure Workload: Micro-segmentation and workload protection across cloud environments.

Cisco Cloudlock: Cloud-native security for SaaS applications.
C1 Cloud Security Services: Proactive threat monitoring and compliance support for hybrid and multi-cloud environments.
Endpoint and User Protection

Cisco Secure Endpoint: Real-time malware detection and endpoint protection.
Cisco Duo Security: Zero Trust access with multi- factor authentication (MFA).

Cisco AnyConnect: Secure VPN access for remote and hybrid workforces.
C1 SOCaaS: Continuous monitoring and rapid incident response to endpoint threats.

Threat Intelligence & Detection

Cisco Talos Intelligence: Real-time global threat intelligence for proactive defense.
Cisco SecureX: Unified security operations with centralized visibility and automated response.

Cisco XDR (Extended Detection and Response): Cross-domain threat detection and response.

Identity and Access Management

Cisco Identity Services Engine (ISE): Centralized identity and access policy enforcement.
Cisco Zero Trust Framework: Comprehensive security for users, devices, and applications.

C1 Advisory Services: Tailored strategies for Zero Trust security adoption.

Why Choose C1 + Cisco?

- **Comprehensive Protection:** End-to-end security coverage across network, cloud, endpoints, and user access.

- **Expert-Driven Services:** 24/7 monitoring, threat detection, and incident response tailored to your organization.

- **Operational Simplicity:** Unified security solutions streamline operations and reduce complexity.

- **Cost Optimization:** Predictable OPEX pricing and simplified licensing through Cisco Enterprise Agreements.

- **Scalable and Flexible:** Security solutions adapt seamlessly to business growth and evolving security demands.
