 Cisco Umbrella

Umbrella

Since the initial onset of the risks presented by the novel coronavirus (COVID-19), we have seen increased traffic demand for Cisco Umbrella. Our system is built with resiliency in mind, it has been business as usual for our cloud service. We continue to monitor overall usage of our cloud infrastructure on a recurring basis, and we continuously make optimizations as needed.

What is included?

- Threat protection like no other — block malware, C2 callbacks, and phishing.
- Predictive intelligence — automates threat protection by uncovering attacks before they launch.
- Corporate Network Protection in Minutes — Quickly protect your on-premise users against threats and bad actors. Remote users can be protected using a small software agent.
- Weekly security report — get a personalized summary of malicious requests & more, directly to your inbox.
- 1,000+ users? — You're eligible for the Umbrella Security Report, a detailed post-trial analysis.
