C1 Safer Schools Program
Customized security solutions for K-12 schools

Schools today are navigating a constantly shifting landscape of security risks and threats. From increasing ransomware attacks to the demand for enhanced physical security on school grounds, the challenges are numerous. Limited budgets and resources to adopt and manage new technologies add yet another layer of complexity.

The C1 Safer Schools program addresses these concerns by providing K-12 institutions with customizable solutions to strengthen their security infrastructure. With a focus on creating a safe, secure, and effective learning environment for students, staff, and administrators, this program includes three core components tailored to meet specific school needs:

- SmartRide
- Total Security Network (TSN)
- Managed Internal Broadband Services (MIBS)

Key benefits

Enhanced security
Address dynamic threats with tailored solutions designed to protect students and staff.

Simplified complexity
Integrated services make adopting, managing, and scaling new technology straightforward.

Cost-effective solutions
Reduce expenses while ensuring the safety and connectivity of your school.

Proven expertise
A trusted partner delivering exceptional results for schools across the nation.

Key features

C1 SmartRide: Enhance safety and learning during school commutes with Wi-Fi-enabled buses.

- **Real-time visibility:** Onboard cameras offer a full view of bus locations and interior activity.
- **Route and rider management:** Easily track and manage student riders with intuitive route management tools.
- **Mobile learning opportunities:** Extend learning beyond the classroom walls by equipping buses with Wi-Fi to create a mobile classroom experience.
- **Safer commutes:** Ensure a secure environment for students while traveling to school or events.

Total Security Network (TSN): A fully managed, integrated security solution designed to safeguard your school.

- **Advanced monitoring:** Enable remote video monitoring for instant access and improved incident management.
- **Instant lockdown capabilities:** Respond quickly to critical situations and secure the school at a moment's notice.
- **Incident Detection:** Identify vaping or bullying behaviors with proactive monitoring sensors and tools.
- **Scalable and simplified operations:** Integrates seamlessly with existing systems, making it easy to protect the school as needs grow.

Managed Internal Broadband Services (MIBS): Keep classrooms connected to ensure uninterrupted learning.

- **Proactive connectivity management:** Powered by C1's OnGuard platform, prevent connectivity disruptions before they happen.
- **Seamless learning experience:** Ensure reliable and uninterrupted internet connections across the school.
- **24x7x365 support:** Around-the-clock assistance to resolve any technical concerns swiftly and efficiently.
