

C1 Total Security Network (TSN)

Comprehensive security for K-12 schools

K-12 schools today face an increasingly complex security landscape, from rising cyber threats like ransomware to the growing need for enhanced physical security across classrooms, playgrounds, restrooms, locker rooms, and buses. Ensuring student and staff safety requires an integrated approach that simplifies operations and maximizes protection.

C1 Total Security Network (TSN) provides a scalable fully managed services, security solution designed to safeguard schools with real-time monitoring, proactive threat detection, and rapid incident response. By integrating seamlessly with existing infrastructure, TSN enhances safety while reducing operational complexity and costs.

Key benefits

Instant lockdown capabilities

Lockdown doors in seconds via a panic button, web browser, or mobile app, ensuring first responders have controlled access.

Proactive threat detection

Leverage sensor technology to detect vaping, smoking, and elevated noise levels in restrooms and locker rooms, helping prevent bullying and substance use.

Visitor management & access control

Conduct cloud-based security screenings and manage visitor access with integrated cameras and access control, preventing unauthorized individuals from entering school premises.

24/7 remote monitoring

Find, save, and share video footage from anywhere. Live camera feeds can be instantly shared with local authorities for real-time situational awareness.

Intrusion prevention & alerts

Set alerts for motion, unauthorized vehicles, or persons of interest to detect and deter intruders or suspicious activity, especially after hours.

Automated door scheduling & role-based access

Ensure secure facilities by automating door schedules around school hours and provisioning staff with appropriate access levels to privileged areas.

Core features

Advanced monitoring & incident management

- Remote video monitoring enables real-time threat detection and rapid response.
- Secure cloud storage allows administrators to access and review footage as needed.
- Live video feeds provide instant collaboration with first responders and law enforcement.

Smart lockdown system

- Emergency lockdowns can be activated instantly from multiple access points.
- Intelligent access control ensures secure evacuation and controlled entry for emergency personnel.

Threat & anomaly detection

- AI-powered sensors detect vaping, smoking, and noise anomalies, alerting staff to potential bullying or disruptive behavior.
- Smart alerts notify security personnel of unusual motion, unauthorized vehicles, or after-hours activity.

Integrated visitor & access control

- Digital visitor management enhances security screening and check-in processes.
- Cloud-based access control ensures only authorized personnel can enter restricted areas.

Seamless Scalability & Simplified Operations

- Easily integrates with existing security systems for a streamlined solution.
- Fully managed services solution reduces IT burden while maintaining optimal security coverage.

Get started with C1 Total Security Network

Empower your school with a proactive security solution that ensures a safe learning environment for students and staff.
