

Engage The Power of We™

Avaya Proactive Outreach Manager

Customers are calling the shots. These days the customer decides how they want to shop or get help from you – whether it’s via mobile device, online, in-store, or over the phone.

To maximize sales and customer satisfaction, it has become critical to engage customers with the right information, at the right time, through the channel they choose...sometimes even before they know they need it.

Meeting growing expectations throughout the customer lifecycle, from acquisition, support, and collections, to retention, has become increasingly challenging.

Avaya Proactive Outreach Manager is the award-winning solution from Avaya for proactive customer acquisition, customer retention, and regaining customers. Whether it’s agent-based predictive dialing campaigns, interactive services, or phone, email, or SMS text alerts and notifications, Proactive Outreach Manager is your one simple-to-use solution to help you achieve your business goals.

- Proactive Notifications/Announcements
- Order/Shipment Status
- Account Alerts
- Fraud Management
- Product Recalls/Service Outage Alerts and Restoration
- SMS, Email, or Phone-based Surveys
- Billing and Collections
- Opt-in Promotions and Upgrades
- Automated Renewals

Total Proactive Solution

Avaya Proactive Outreach Manager delivers proactive outreach and outbound applications for every stage of your customer engagement lifecycle, including:

- Welcome and Customer Onboarding Messages
- Telemarketing/Fundraising
- Enrollments and Renewals
- Confirmations/Reminders

Key Benefits

Avaya Proactive Outreach Manager can:

- Differentiate your brand experience with innovative SMS, email and phone-based marketing and communications strategies that truly engage your customers with the right information at the right time
- Improve customer satisfaction and the effectiveness of your customer facing operations with automated agent-less and agent-based proactive customer care strategies

Imagine the Possibilities

- A large home improvement retailer proactively reaches out to new job applicants using automated phone screening
- A well-known, national retailer uses proactive SMS messaging daily to reach out and inform layaway customers of product order and pick-up status
- A large telecommunications services provider and retailer reaches out to new and existing customers using automated SMS and email follow-up surveys to monitor customer satisfaction
- A hospital chain proactively contacts patients via SMS text, email messages, and phone calls with appointment reminders, billing and collections, and remote patient monitoring
- A local government agency leverages SMS messages and email with escalation to outbound agents to help reduce the service cost of billing reminders and payment collection

- Reduce ongoing service and support costs leveraging automated SMS text, email, and phone notifications enabled by powerful contact strategies
- Collect revenue faster with automated multichannel notifications and shrink recovery costs by engaging collections staff only when truly necessary
- Improve agent productivity with our industry-leading progressive, predictive dialing modes. Set achievement of your target service levels on “autopilot” with cruise control dialing

Key Features

Proactive Outreach Manager unifies agent-based predictive, progressive, and preview dialing with automated multichannel notifications and alerts into one simple software-only solution.

Industry-leading human voice and tone detection

Maximize the time your agents spend talking with customers with Proactive Outreach Manager Enhance Call Progress Analysis, one of the fastest, most accurate call detection technology available in the industry. It detects the difference between live voices, voicemail, fax, and busy signals with up to 97.9% accuracy¹ and delivers the maximum number of live customers and prospects to your agents. Enhanced Cell Phone Detection capabilities further fine tune accuracy, helping to improve dialing effectiveness when campaigns are targeting mobile customers.

Sophisticated outbound dialing modes

Preview, progressive, predictive, and cruise control dialing modes let you choose the way you want to work while optimizing agent productivity and live party connections.

Agent blending

A skills-based blender helps you achieve optimum service levels on the inbound contact center, consistent with outbound campaign objectives. Skills-based inbound and outbound agent blending also helps maximize use of your existing agents during times of low inbound call volume.

Stay in compliance

Help ensure your campaigns and contact strategies comply with the most stringent government and industry regulations from OFCOM to the FCC/FTC. The solution supports Do Not Call lists, Opt-out, and Opt-In.

Powerful campaign strategies

Execute time sensitive goal-based campaigns that help you achieve your business objectives quickly and effectively. Offer opt-in notification services that leverage lower cost, customer preferred mobile, SMS text, and email. Build escalating strategies into your campaigns such as attempting alternative channels, such as email or SMS text, based on prior interaction outcomes, customer preferences, or other conditions like shifting from email to agent-based calls based on urgency. This helps ensure the highest possible Right Party Connect rate at the lowest possible cost.

¹ Based on internal Avaya testing of Avaya Proactive Outreach Manager and the top three leading outbound dialer companies.

Real-time customer status sharing

Avoid duplicate notifications or asking your customer for information more than once. Share customer data such as preferences (e.g., opt-in/opt-out) or status changes (e.g., delinquent bill is paid) in real-time across all concurrent campaigns to achieve optimal customer engagement.

Campaign management for everyone

Centralized web-based management and dashboards simplify execution and monitoring of all your campaigns, contact lists, and resources. Empower your managers to design and manage their own outbound marketing, sales, and service campaigns with flexible multi-tenancy and roles based access controls.

Real-time contact list management

Manage lists using virtually any data source, add new contacts to existing campaigns, or modify contact lists without interrupting campaign execution.

Monitoring and reporting

Keep track of your campaign effectiveness with web accessible real-time and historical reports that provide a unified view of campaign success, agent performance, and customer status.

Campaign pacing and throttling

Effectively use automated pace-phone, SMS text messaging, and email notifications that are based on target inbound service levels. Leverage key data like agent “Expected Wait Time” to manage service levels by automatically throttling campaign contact attempts.

Agent desktop

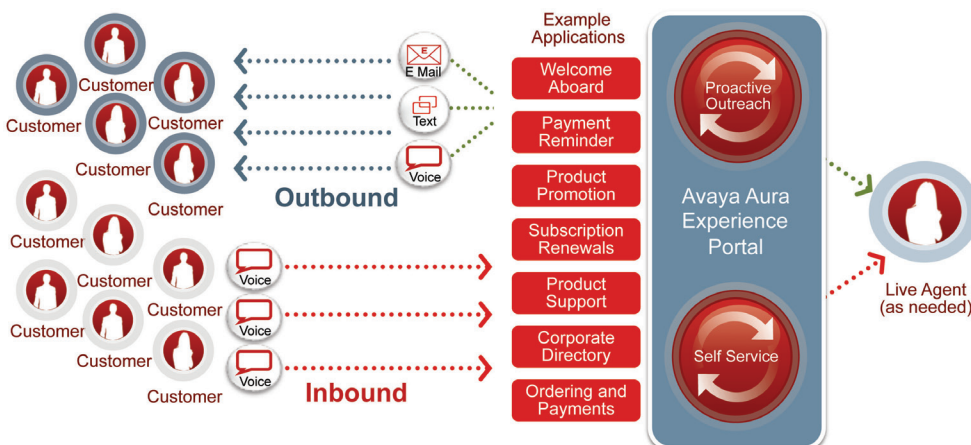

Comprehensive agent desktop APIs and agent scripting support help ensure your outbound agents have the right customer and business information at their fingertips to successfully achieve your business results.

Quickly create sophisticated service applications

Extensive web services help you better repurpose and reuse your existing web applications and services. Use Avaya Aura® Orchestration Designer to design sophisticated, highly interactive applications that dynamically adjust their behavior based on customer status, business rules, contact lists, call schedules, or agent availability.

Solution Highlights

- Prioritize multiple, simultaneous billing, collections, and proactive customer care campaigns with minimal staffing and resources
- Leverage two-way SMS messaging and email with cross-channel escalation: start an engagement with a SMS message, follow-up with a call, send an email confirmation all in one campaign
- Industry-leading dialing effectiveness – 98% live person detection accuracy at less than a second²
- Software-based dialing for ease of operations, administration and maintenance
- Skills-based outbound and inbound agent blending
- Contact center integration – single agent administration, blending with inbound agents
- Desktop APIs for creation of productive agent experiences specific to your business needs
- Leverage SIP, Web services, virtualization, and high availability to lower the cost of mission critical services

Proactive Outreach Contact Flow

² Based on internal Avaya testing of Avaya Proactive Outreach Manager and the top three leading outbound dialer companies.

About Avaya

Avaya is a leading, global provider of customer and team engagement solutions and services available in a variety of flexible on-premise and cloud deployment options. Avaya's fabric-based networking solutions help simplify and accelerate the deployment of business critical applications and services. For more information, please visit www.avaya.com.

Interactive phone, email, and SMS text engagement

Engaging your customers with the right resource at the right time via their most preferred mode of communication helps promote customer satisfaction and loyalty. Support for two-way, interactive phone, email, and SMS text messaging allows you to create highly effective and engaging experiences on customer preferred devices and channels

Contact center integration

Proactive Outreach Manager runs on Avaya Aura® Experience Portal and supports integration with all of your self-service applications and call routing workflows, as well as Avaya Aura® Call Center Elite and Avaya Aura® Contact Center for agent-based customer outreach with predictive, progressive and preview dialing campaigns.

Outbound call recording

Integration with Avaya Aura® Workforce Optimization contact recording can help you meet business critical compliance requirements or bulk recording tasks. Avaya Aura Workforce Optimization provides a software-based solution to capture customer interactions, including voice and data interactions in SIP, IP, TDM, and mixed telephony environments.
