

INTERNATIONAL SERVICES DELIVERING DIGITAL MODERNIZATION, COLLABORATION AND CLOUD IN A BORDERLESS WORLD

To meet the challenges of today, service providers must meet their customers’ business needs wherever they operate. Delivering and supporting technology solutions across geographic locations presents a unique set of challenges in dealing with multiple partners, language barriers, time zones and customs charges. As your strategic technology solutions partner, ConvergeOne provides a globally consistent framework for multinational service delivery, reducing the cost, complexity and time to deployment and management of technology solutions.

SIMPLIFYING GLOBAL DELIVERY

- + **Single point of accountability:** One contract, one point of contact, so you don’t have to worry about multiple vendors, multiple countries and the associated currency exchange, tax codes and compliance issues.
- + **Speed-to-value:** We bring the collective knowledge of our global partners to your front door, giving you the help needed to optimize your technology investment and service delivery.
- + **Optimal cost:** Simplified design, procurement and deployment of technology solutions to end users across the globe helps us deliver solutions at the optimal price point.
- + **Reduced risk and predictable results:** Our team uses a consistent global approach with built-in quality assurance mechanisms, providing a comprehensive service with control over your entire estate.
