

# Secure Your Future Success

## C1 is a recognized leading security provider with an extensive cybersecurity portfolio.

Flexing your business to compete in today's hyper-connected, hyper-distributed environment creates increased risk.

It's a risk you can't ignore, but C1 cybersecurity solutions help you to manage those risks and secure new opportunities for growth.

### Security solutions for business outcomes

Every business is evolving and transforming to create opportunities and meet new challenges. The expanded threat landscape drastically increases the likelihood of a damaging cyber breach. C1 advisors and cybersecurity solutions simplify and amplify the defenses needed to secure the enterprise as it flexes and grows.

Our integration heritage, from modern workplace to complex cloud transformations, provide end-to-end security. Layer in an innovative and collaborative partner ecosystem and we provide cutting-edge, secure outcomes to accelerate success.

**75%**  
of businesses are expected to face a cyberattack this year.

**\$4.35 million**  
was the average cost of a data breach globally in 2023.

**67%**  
of organizations reported increased phishing attack frequency over the past year.

**53%**  
of businesses are adopting Zero Trust to counter growing threats.

## Enterprise solutions designed to meet your needs

### Prevent, detect, recover

#### People, identity, and access

- **Manage context-sensitive identities, access, and interactions** across hybrid infrastructures, multi-cloud, and ubiquitous networks for zero trust distributed workers and workloads.

#### Data security

- **Protect data** at rest, in motion, in use, or vaulted. Ensure compliance, pseudonymization, encryption, and protect against data loss, theft, and rights infringement.

#### Infrastructure and cloud protection

- **Secure hybrid-cloud infrastructure** to protect applications, workloads, networks, infrastructure, and endpoints from exploitation and attack, with automation, context sensitive AI, ML, and response.

### Success stories

1. A prominent school district was crippled by ransomware. In a collaborative effort, C1 set up a comprehensive Cyber Recovery Vault, an immutable backup replica repository. Governance procedures, runbooks, and staff training for a simulated cyber recovery event further increased resilience.
2. A sizable human services provider migrated several new patient database projects to the cloud. C1 provided a data protection refresh and deployed a comprehensive integrated data protection solution to consolidate and simplify the data protection environment to a single solution for all workloads in the cloud.
3. A state government's public safety department needed a solution for facial recognition technology to accurately make image comparisons for criminal investigations. In a collaborative effort, C1 provided the world's fastest and most accurate facial recognition solution, according to the National Institute of Standards and Technology (NIST) in the United States. The net result - improved public safety.

## Speak with a cybersecurity advisor today

Strategically increase cyber resilience aligned to business goals. Manage risks, prevent attacks, detect and mitigate threats in real time, avoid compliance fines, recover from attacks, and minimize damage.
